

# On the likelihood of **Gravitational Wave** emission during the Tidal Disruption of stars by SMBHs

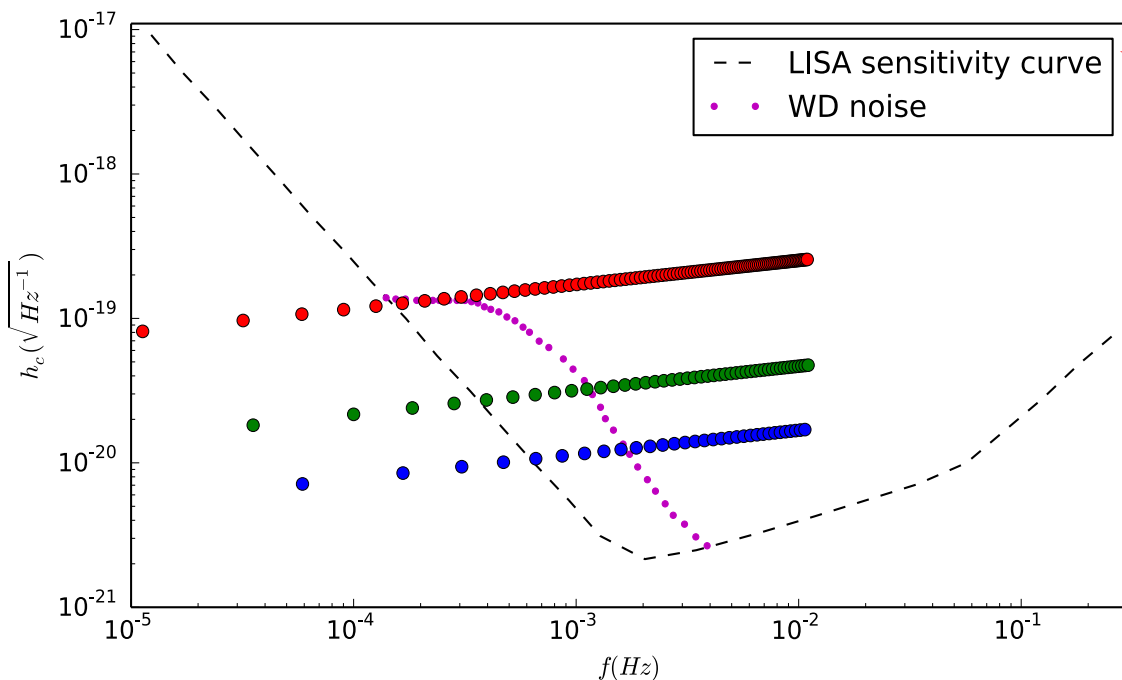

Martina Toscani, University of Pavia; Giuseppe Lodato, University of Milan.

## WHAT

Study of a hot, thick, **UNSTABLE** accretion disc with a strongly varying mass quadrupole

## HOW

- Analytical study
- Numerical study (IN PROGRESS!)
- Rotating Black Hole (NEXT STEP!)

## VISIBLE SIGNAL

To know more, come and see my poster, it would be my pleasure to explain this work to you!
